

Greg Beaulieu

Greg Beaulieu is a class of 2021 graduate who firsthand experienced the struggles that a person with difficulties focusing would have in the already broken school system. The school system itself was developed centuries ago and apart from having more technology in classrooms it hasn't evolved nearly as much as it should have. Greg believes that if it wasn't for alternative classes such as the roving campus he probably wouldn't have graduated. The same approach to every student is one of the main reasons why the school system is failing not everyone is able to effectively learn seated in a classroom taking notes all day. Apart from the school system being ineffective to many Greg also believes that schools aren't teaching some skills that are crucial for success in life such as how to calculate Insurance and mortgage payments. Greg is running for school board to not only help bring necessary evolution to the school system within portage but to also be the first youth elected to the Portage la Prairie school board.
